## **“BeagleHost” Web/email Hosting Begins January 1, 2010**

### **To All Web/email Customers**

December 22, 2009

**NOTICE:** Please see the previous notices regarding Computer Medic, Inc. (CMI) closing, dissolution and discontinuation of web/email hosting.

**PLAN:** *Stephen* will “restart” BeagleHost as its own company January 1, 2010. BeagleHost (or beaglehost.com) will honor all “paid in advance” service deadlines and expirations. CMI will transfer all “startup/new” accounts and renewals from November and December to BeagleHost for billing after the first of the year. All servers and equipment will remain in Dunn (some in rented space at MLD Computers, some in another rental space). New server(s) are being put online by MLD and BeagleHost. Contact information will be updated at <http://www.computermedic.org> as it becomes available. For the immediate future (at least through June, 2010) messages regarding web/email hosting will be accepted at MLD (910-892-1616), and the domain/email accounts at computermedic.org will be maintained indefinitely.

**EXPECTED DOWNTIME:** During the afternoon and night of New Year’s Eve (December 31, 2009) there will be some expected downtime during the transfer of web “pages,” databases and email accounts to the new equipment.

**NO “Old/Archive” DATA TRANSFER:** There are several customers with email “boxes” larger than 20GB (20-billion-bytes), consisting of millions of email messages. Although the accounts (username & password) will be transferred to the new server(s), the data cannot be transferred because of the immense volume and size. Private arrangement will have to be made for the backup and transfer of those domains email archives.

**TRANSFER “AWAY” NOTIFICATION:** If any customer wishes to transfer to an “ISP” or “Host” other than “BeagleHost” – please notify us by email ( [support@computermedic.org](mailto:support@computermedic.org) ) before your new ISP/Host initiates a “transfer request.” We will not honor or accept any “anonymous” or “unsolicited” domain transfers for the domains owned/used by our customers.
